

HR SaaS & ESS Mobile App case study

The Challenge: You are the Product Manager for a new SaaS HR platform featuring an Employee Self-Service (ESS) mobile app. Your goal is to penetrate the Egypt and Gulf markets, where many companies still rely on legacy ERPs or manual processes.

Your objective: To demonstrate your strategic thinking, market understanding, and product execution capabilities. Please prepare a **20-minute presentation (Max of 8 slides)** followed by a 20-minute Q&A. Feel free to prepare any other documents that could support your analysis (with references).

Due date will be mentioned in the email body, please make sure to reply on the email with your analysis documents before this date.

1. Market Analysis

- What is the current SaaS HR platform market situation, key drivers, and opportunities/risks?
- Who are the main competitors and what do they offer?

2. Targeting & Differentiation

- Which segments should we target, when, and why?
- What specific "pain points" are you solving for a CHRO, Line managers, and entry-level employee?
- How will we compete and differentiate our product offer?

3. Product Strategy

- Product vision, objectives, value proposition, and positioning
- Outline a 12-month high-level roadmap for market entry (AI features is recommended)
- How will you prioritize features, integration with legacy systems like SAP or Oracle?
- Which local partnerships are essential for your first 6 months?

4. Execution & Metrics

- OKRs and success metrics of the product
- Recommend a pricing model that remains competitive within the target segments.
- GTM Strategy & Sales enablement
- What is your marketing message for a company currently using paper-based leave management?
